Two Investment Options

Ideal for

- Gig economy entrepreneurs
- Roadside assistance providers
- EV dealerships and fleet owners
- Passive investors in clean tech

Option 1

Already Own a
Nissan Leaf

No need to purchase a vehicle

Pay only:

- EV Buddy Security Deposit:
\$5,000 (refundable)
- Quarterly Platform Fee:
\$597 (3 months in advance)
- Monthly Insurance: ~\$100
- May still be eligible for the
4,000 Used EV Federal Tax Credit

Effective Startup Cost:
~\$5,000

Option 2

Purchase with
Used Nissan Leaf

Need to purchase a vehicle

Pay only:

- Used Nissan Leaf: ~\$12,000
- Federal EV Tax Credit: -\$4,000
- EV Buddy Security Deposit:
\$5,000
- Quarterly Platform Fee: \$597
- Monthly Insurance: ~\$100

Effective Startup Cost:
~\$13,000

Owner and Driver are the Same Entity?

- You keep both the owner and driver share – a full 80% of the revenue
 - This significantly boosts your net income and speeds up ROI

**ev buddy****evchargetshare®**

Indirect Revenue Opportunities

- New EV Car Dealers: Increase sales by offering free charging services as an incentive
- Used EV Car Dealers: Offer charging-as-a-service to increase foot traffic and close sales
- Car Rental Operators: Add emergency charging delivery as a value-added offering
- Repair & Service Shops: Provide mobile support for stalled EVs and generate incremental income

IncomePotential (Assuming \$80 per Delivery)

Break-even at ~15 deliveries/month — all revenue covers expenses, with no profit or loss. Upside potential begins immediately after this volume is reached.

Scenario	Deliveries per Month	Miles per Month	Gross Revenue	Car Owner Share (40%)	Driver Share (40%)	EV Buddy Share (20%)	Net Monthly Profit (Car Owner) (20%)
Breakeven	15	~150 mi	\$1,200	\$480	\$480	\$240	\$181
Base	20	~200 mi	\$1,600	\$640	\$640	\$320	\$341
2x Volume	40	~400 mi	\$3,200	\$1,280	\$1,280	\$640	\$981
3x Volume	60	~600 mi	\$4,800	\$1,920	\$1,920	\$960	\$1,621
